

Nginx安装

1. 安装 : yum

```
[root@localhost /]# yum install yum-utils
```

2. 切换目录 :

```
[root@localhost /]# cd /etc/yum.repos.d/
```

3. 创建文件 :

```
[root@localhost yum.repos.d]# touch nginx.repo
```

4. 修改文件内容 :

```
[nginx-stable]
name=nginx stable repo
baseurl=http://nginx.org/packages/centos/$releasever/$basearch/
gpgcheck=1
enabled=1
gpgkey=https://nginx.org/keys/nginx_signing.key
module_hotfixes=true

[nginx-mainline]
name=nginx mainline repo
baseurl=http://nginx.org/packages/mainline/centos/$releasever/$basearch/
gpgcheck=1
enabled=0
gpgkey=https://nginx.org/keys/nginx_signing.key
module_hotfixes=true
```

5. Nginx的安装 :

```
[root@localhost yum.repos.d]# yum install nginx
```

安装完成 : 我们的版本 : nginx.x86_64 1:1.20.2-1.el7.ngx
